

STANLEY STEEMER

COVID-19 PROTOCOL REMAINING OPEN TO HELP OUR CUSTOMERS

During these uncertain times, Stanley Steemer is proud to be an essential work force dedicated to the cleanliness and disinfection of local homes and business and the well being of their occupants. We've updated our cleaning processes and safety protocol in alignment with CDC recommendations and offer 3 options to keep your home and business clean and healthy.

CLEANING SERVICE

According to the CDC, cleaning is the necessary first step of any disinfection process. Cleaning removes organic matter, salts, and visible soils, all of which interfere with microbial inactivation. If a surface is not cleaned first, the success of the disinfection process can be compromised.

DISINFECTANT SERVICE

Stanley Steemer® now cleans all environmental surfaces* with an EPA Registered Antimicrobial Disinfectant that meets the EPA's current criteria for use against SARS-CoV-2. In residential settings, we can disinfect Hard/Non-porous surfaces such as railings, countertops, knobs, door handles, tables, and other high touch areas.

SANITIZATION SERVICE

Stanley Steemer can fog your facility to help create a cleaner, healthier work environment. Our process uses Vital Oxide, a hospital grade disinfectant that is listed on the EPA website as a product to use against Covid-19. Fogging the product will be distributed as a sanitizer across hard surfaces such as walls, furniture, windows and electronics.
